PURIFIED HUMAN GAMMA GLOBULIN

100MG

Catalog #: 55838

Lot #: 06305

Total Protein: 17.4 mg/ml

Volume: 6 ml

DESCRIPTION:

Product is the lyophilized powder of human gamma globulin and buffer salts.

Human gamma globulin is purified from pooled human serum using multi-step procedures which may include salt fractionation, ion-exchange chromatography and immunoabsorption. The product is dialyzed into 0.01M sodium phosphate, with 0.07M sodium chloride, pH 7.3, filtered through a 0.22 μ m filter, vialled and lyophilized. No preservative has been added.

USES:

This product is suitable for use as a carrier protein in secondary antibody systems, e.g., radioimmunoassay. Purified proteins are recommended as ELISA coating antigens and as controls.

See **Related Product Ordering Information**.

SPECIFICATIONS:

The product is tested for purity at a minimum of 20 mg/ml using immunoelectrophoresis. The product is primarily human IgG, IgA, IgM.

The total protein is determined using the Biuret procedure, with bovine albumin as the standard. Each vial is over filled by approximately 10 per cent so that a minimum of 100 mg of human gamma globulin is obtained upon reconstitution.

RECONSTITUTION:

Reconstitute product with 6 ml of deionized or distilled water. Gentle swirling may be used to speed rehydration. Avoid vigorous shaking of the constituted material.

STORAGE:

Store unopened product at 2-8°C. Store reconstituted material no longer than a few days at 2-8°C unless sodium azide is added. For long-term storage, aliquot and freeze at -20°C.

WARNING AND CAUTION:

This product is intended **FOR RESEARCH USE ONLY**, not for use in diagnostic or therapeutic procedures involving humans or animals.

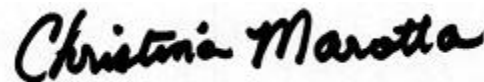

All blood products should be treated as potentially infectious. Source material from which this product was derived was found negative when tested in accordance with current FDA required tests. No known test methods can offer assurance that products derived from human blood will not transmit infectious agents.
