**GOAT ANTISERUM TO HORSE SERUM
(FORENSIC) - 2ML**

Catalog #: 56002

Lot #: 03128

Total Protein: 65.9 mg/ml

DESCRIPTION:

Product is the lyophilized powder of goat antiserum to horse serum and buffer salts.

The antiserum is prepared by immunizing goats with horse serum; antiserum is delipidated and made specific by immunoabsorption with soluble antigens or solid-phase immunoabsorption where appropriate. The resulting antiserum is dialyzed into 0.02M sodium phosphate, 0.14M sodium chloride, pH 7.3, with 0.05% sodium azide, adjusted to standard titer, filtered through a 0.22 µm filter, vialled and lyophilized.

USES:

This product is intended for use as a precipitating antibody. It gives sharp precipitin lines in immunoelectrophoresis, capillary tube, and immunodiffusion techniques.

SPECIFICATIONS:

The total protein is measured using the Biuret procedure, with bovine albumin as the standard. The product shows the following reactions at the stated horse serum dilutions:

Horse Serum Dilution	Immunodiffusion Assay		Micro Tube Precipitin Assay	
	24 Hour	48 Hour	15 Minutes	30 Minutes
1:3	++	++	+++	++++
1:10	+	+	+++	++++
1:100	+	+	++	++
1:1000	0	+	0	0

The product has been tested at 60 mg/ml and found negative against the following whole sera at 20-25 mg/ml:

Bear Deer Hamster Rabbit Turkey
Bovine Dog Human Rat
Cat Goat Monkey Sheep
Chicken Guinea Pig Mouse Swine

RECONSTITUTION:

Reconstitute product with 2.0 ml of deionized or distilled water. Gentle swirling may be used to speed rehydration. Avoid vigorous shaking of the reconstituted material. If a small amount of precipitate is present, or if preparation appears cloudy, clarify by centrifugation or filtration.

STORAGE:

Store product at 2-8°C. Store reconstituted material no longer than 4 weeks at 2-8°C. For long-term storage, aliquot and freeze reconstituted product at -20°C or lower.

WARNING AND CAUTION:

This product is intended **FOR RESEARCH USE ONLY**, not for use in diagnostic or therapeutic procedures involving humans or animals.

This product contains sodium azide. To prevent formation of toxic vapors, do not mix with strongly acidic solutions. To prevent formation of potentially explosive metallic azides in metal plumbing, always wash into drain with copious quantities of water.
